

# CENICS 2018

## Forward

The Eleventh International Conference on Advances in Circuits, Electronics and Micro-electronics (CENICS 2018), held between September 16, 2018 and September 20, 2018 in Venice, Italy, continued a series of events initiated in 2008, capturing the advances on special circuits, electronics, and micro-electronics on both theory and practice, from fabrication to applications using these special circuits and systems.

Innovations in special circuits, electronics and micro-electronics are the key support for a large spectrum of applications. The conference is focusing on several complementary aspects and targets the advances in each on it: signal processing and electronics for high speed processing, micro- and nano-electronics, special electronics for implantable and wearable devices, sensor related electronics focusing on low energy consumption, and special applications domains of telemedicine and eHealth, bio-systems, navigation systems, automotive systems, home-oriented electronics, bio-systems, etc. These applications led to special design and implementation techniques, reconfigurable and self-reconfigurable devices, and require particular methodologies to be integrated on already existing Internet-based communications and applications. Special care is required for particular devices intended to work directly with human body (implantable, wearable, eHealth), or in a human-close environment (telemedicine, house-oriented, navigation, automotive). The mini-size required by such devices confronted the scientists with special signal processing requirements.

We take here the opportunity to warmly thank all the members of the CENICS 2018 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated their time and effort to contribute to CENICS 2018. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the CENICS 2018 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that CENICS 2018 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of circuits, electronics and micro-electronics. We also hope that Venice, Italy provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

### **CENICS 2018 Chairs**

#### **CENICS Steering Committee**

Falk Salewski, Muenster University of Applied Sciences, Germany

Chun-Hsi Huang, University of Connecticut, USA

Vladimir Privman, Clarkson University - Potsdam, USA

Diego Ettore Liberati, National Research Council of Italy, Italy  
Julio Sahuquillo, Universitat Politècnica de València, Spain  
Sergei Sawitzki, FH Wedel (University of Applied Sciences), Germany  
Manuel José Cabral dos Santos Reis, University of Trás-os-Montes e Alto Douro, Portugal  
Bartolomeo Montrucchio, Politecnico di Torino, Italy  
Petr Hanáček, Brno University of Technology, Czech Republic

**CENICS Research/Industry Committee**

John Vardakas, Iquadrat Informatica, Barcelona, Spain  
Laurent Fesquet, TIMA laboratory | Grenoble Institute of Technology, France  
Christian Wögerer, PROFACTOR GmbH, Austria  
Miroslav Velez, Aries Design Automation, USA  
Ivo Stachiv, Institute of Physics | Czech Academy of Sciences, Prague, Czech Republic / Harbin  
Institute of Technology | Shenzhen Graduate School, Shenzhen, China  
Amir Shah Abdul Aziz, TM Research & Development, Malaysia
