

# CLOUD COMPUTING 2020

## Forward

The Eleventh International Conference on Cloud Computing, GRIDs, and Virtualization (CLOUD COMPUTING 2020), held on October 25 - 29, 2020, continued a series of events targeted to prospect the applications supported by the new paradigm and validate the techniques and the mechanisms. A complementary target was to identify the open issues and the challenges to fix them, especially on security, privacy, and inter- and intra-clouds protocols.

Cloud computing is a normal evolution of distributed computing combined with Service-oriented architecture, leveraging most of the GRID features and Virtualization merits. The technology foundations for cloud computing led to a new approach of reusing what was achieved in GRID computing with support from virtualization.

The conference had the following tracks:

- Cloud computing
- Computing in virtualization-based environments
- Platforms, infrastructures and applications
- Challenging features

Similar to the previous edition, this event attracted excellent contributions and active participation from all over the world. We were very pleased to receive top quality contributions.

We take here the opportunity to warmly thank all the members of the CLOUD COMPUTING 2020 technical program committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to CLOUD COMPUTING 2020. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the CLOUD COMPUTING 2020 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that CLOUD COMPUTING 2020 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of cloud computing, GRIDs and virtualization.

### **CLOUD COMPUTING 2020 Steering Committee**

Carlos Becker Westphall, Federal University of Santa Catarina, Brazil

Yong Woo Lee, University of Seoul, Korea

Bob Duncan, University of Aberdeen, UK

Aspen Olmsted, College of Charleston, USA

Alex Sim, Lawrence Berkeley National Laboratory, USA

Sören Frey, Daimler TSS GmbH, Germany

Andreas Aßmuth, Ostbayerische Technische Hochschule (OTH) Amberg-Weiden, Germany

Uwe Hohenstein, Siemens AG, Germany

**CLOUD COMPUTING 2020 Publicity Chair**

Javier Rocher, Universitat Politecnica de Valencia, Spain

**CLOUD COMPUTING 2020 Industry/Research Advisory Committee**

Raul Valin Ferreiro, Fujitsu Laboratories of Europe, Spain

Bill Karakostas, VLTN gcv, Antwerp, Belgium

Matthias Olzmann, noventum consulting GmbH - Münster, Germany

Hong Zhu, Oxford Brookes University, UK
