

COLLA 2011

Foreword

The First International Conference on Advanced Collaborative Networks, Systems and Applications [COLLA 2011], held between June 19 and 24, 2011, in Luxembourg, initiated a series of events dedicated to advanced collaborative networks, systems and applications, focusing on new mechanisms, infrastructures, services, tools and benchmarks.

Collaborative systems became a norm due to the globalization of services and infrastructures and to multinational corporation branches. While organizations and individuals relied on collaboration for decades, the advent of new technologies (Web services, Cloud computing, Service-oriented architecture, Semantics and Ontology, etc.) for inter- and intra- organization collaboration created an enabling environment for advanced collaboration.

As a consequence, new developments are expected from current networking and interacting technologies (protocols, interfaces, services, tools) to support the design and deployment of a scalable collaborative environments. Innovative systems and applications design, including collaborative robots, autonomous systems, and consideration for dynamic user behavior is the trend.

We take here the opportunity to warmly thank all the members of the COLLA 2011 Technical Program Committee, as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to COLLA 2011. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the COLLA 2011 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that COLLA 2011 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of collaborative networks, systems and applications.

We are convinced that the participants found the event useful and communications very open. We also hope the attendees enjoyed the historic charm Luxembourg.

COLLA 2011 Chairs:

Gokce Banu Laleci Erturkmen, SRDC Ltd., Turkey

Lasse Berntzen, Vestfold University College - Tønsberg, Norway

Antonio De Nicola, ENEA, Italy

Petre Dini, Concordia University, Canada / China Space Agency Center, China

Miguel Garcia Pineda, Polytechnic University of Valencia, Spain

Jaime Lloret Mauri, Universidad Politécnica de Valencia, Spain

Dennis McLeod, University of Southern California - Los Angeles, USA

Vicente Romero, Atos Research & Innovation, Spain
Tanja Vos, Universidad Polit3cnica de Valencia, Spain
Abdulrahman Yarali, Murray State University, USA
