

EMERGING 2017

Forward

The Ninth International Conference on Emerging Networks and Systems Intelligence (EMERGING 2017), held between November 12 - 16, 2017, in Barcelona, Spain, constituted a stage to present and evaluate the advances in emerging solutions for next-generation architectures, devices, and communications protocols. Particular focus was aimed at optimization, quality, discovery, protection, and user profile requirements supported by special approaches such as network coding, configurable protocols, context-aware optimization, ambient systems, anomaly discovery, and adaptive mechanisms.

Next-generation large distributed networks and systems require substantial reconsideration of existing 'de facto' approaches and mechanisms to sustain an increasing demand on speed, scale, bandwidth, topology and flow changes, user complex behavior, security threats, and service and user ubiquity. As a result, growing research and industrial forces are focusing on new approaches for advanced communications considering new devices and protocols, advanced discovery mechanisms, and programmability techniques to express, measure and control the service quality, security, environmental and user requirements.

The conference had the following tracks:

- Technology and networking trends
- Applications and services

We take here the opportunity to warmly thank all the members of the EMERGING 2017 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to EMERGING 2017. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the EMERGING 2017 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that EMERGING 2017 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of emerging networks and systems intelligence.

We also hope that Barcelona, Spain, provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

EMERGING 2017 Chairs

EMERGING Steering Committee

Carl James Debono, University of Malta, Malta
Raj Jain, Washington University in St. Louis, USA
Ioannis Moscholios, University of Peloponnese, Greece
Henrik Karstoft, Aarhus University, Denmark
Samuel Fosso Wamba, Toulouse Business School, France
Masakazu Soshi, Hiroshima City University, Japan
Robert Bestak, Czech Technical University in Prague, Czech Republic
Dong Ho Cho, KAIST, Republic of Korea
Tamás Matuszka, INDE R&D, Budapest, Hungary
Emilio Insfran, Universitat Politècnica de Valencia, Spain
Mark Leeson, University of Warwick, UK

EMERGING Industry/Research Advisory Committee

Euthimios Panagos, Vencore Labs, USA
Dimitris Kanellopoulos, University of Patras, Greece
Linda R. Elliott, Army Research Laboratory, USA
Jason Zurawski, Lawrence Berkeley National Laboratory / Energy Sciences Network, USA
Rawa Adla, University of Detroit Mercy | Ford Motor Company, USA
Arun Das, Visa Inc., USA
Shaohan Hu, IBM Research, USA
Eric MSP Veith, TU Bergakademie Freiberg, Germany
Xiaochuan Fan, HERE North America LLC, USA
