

FUTURE COMPUTING 2014

Foreword

The Sixth International Conference on Future Computational Technologies and Applications (FUTURE COMPUTING 2014), held between May 25-29, 2014 in Venice, Italy, targeted advanced computational paradigms and their applications. The target was to cover (i) the advanced research on computational techniques that apply the newest human-like decisions, and (ii) applications on various domains. The new development led to special computational facets on mechanism-oriented computing, large-scale computing and technology-oriented computing. They are largely expected to play an important role in cloud systems, on-demand services, autonomic systems, and pervasive applications and services.

We take here the opportunity to warmly thank all the members of the FUTURE COMPUTING 2014 Technical Program Committee, as well as all of the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to FUTURE COMPUTING 2014. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the FUTURE COMPUTING 2014 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that FUTURE COMPUTING 2014 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the area of future computational technologies and applications.

We are convinced that the participants found the event useful and communications very open. We hope that Venice, Italy, provided a pleasant environment during the conference and everyone saved some time to enjoy the charm of the city.

FUTURE COMPUTING 2014 Chairs:

Cristina Seceleanu, Mälardalen University, Sweden

Hiroyuki Sato, The University of Tokyo, Japan

Miriam A. M. Capretz, The University of Western Ontario - London, Canada

Kendall E. Nygard, North Dakota State University - Fargo, USA

Vladimir Stantchev, SRH University Berlin - Institute of Information Systems, Germany

Wail Mardini, Jordan University of Science and Technology, Jordan

Alexander Gegov, University of Portsmouth, UK

Francesc Guim, Intel Corporation, Spain

Wolfgang Gentsch, The UberCloud, Germany

Noboru Tanabe, Toshiba Corporation, Japan
