

# HEALTHINFO 2022

## Forward

The Seventh International Conference on Informatics and Assistive Technologies for Healthcare, Medical Support and Wellbeing (HEALTHINFO 2022), held between October 16<sup>th</sup> and October 20<sup>th</sup>, 2022, continued a series of events on particular aspects belonging to health informatics systems, health information, health informatics data, health informatics technologies, clinical practice and training, and wellbeing informatics in terms of existing and needed solutions.

The progress in society and technology regarding the application of systems approaches information and data processing principles, modeling and information technology, computation and communications solutions led to a substantial improvement of challenges in assistive healthcare, public health, and the everyday wellbeing. While achievements are tangible, open issues related to global acceptance, costs models, personalized services, record privacy, and real-time medical actions for citizens' wellbeing are still under scrutiny.

We take here the opportunity to warmly thank all the members of the HEALTHINFO 2022 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to HEALTHINFO 2022. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the HEALTHINFO 2022 organizing committee for their help in handling the logistics of this event.

We hope that HEALTHINFO 2022 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of informatics and assistive technologies for healthcare, medical support and wellbeing.
