

IMMM 2022

Forward

The Twelfth International Conference on Advances in Information Mining and Management (IMMM 2022), held between June 26th and June 30th, 2022, continued a series of events focusing on advances in all aspects related to information mining, management, and use.

The amount of information and its complexity makes it difficult for our society to take advantage of the distributed knowledge value. Knowledge, text, speech, picture, data, opinion, and other forms of information representation, as well as the large spectrum of different potential sources (sensors, bio, geographic, health, etc.) led to the development of special mining techniques, mechanisms support, applications and enabling tools. However, the variety of information semantics, the dynamic of information update and the rapid change in user needs are challenging aspects when gathering and analyzing information.

We take here the opportunity to warmly thank all the members of the IMMM 2022 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to IMMM 2022. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the IMMM 2022 organizing committee for their help in handling the logistics of this event.

We hope that IMMM 2022 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of Information Mining and Management.

IMMM 2022 Chairs

IMMM 2022 Steering Committee

An-An Liu, Tianjin University, China

IMMM 2022 Publicity Chairs

José Miguel Jiménez, Universitat Politècnica de València (UPV), Spain

Laura Garcia, Universitat Politècnica de València (UPV), Spain
