

INTERNET 2017

Foreword

The Ninth International Conference on Evolving Internet (INTERNET 2017), held between July 23 - 27, 2017 - Nice, France, dealt with challenges raised by evolving Internet making use of the progress in different advanced mechanisms and theoretical foundations. The gap analysis aimed at mechanisms and features concerning the Internet itself, as well as special applications for software defined radio networks, wireless networks, sensor networks, or Internet data streaming and mining.

Originally designed in the spirit of interchange between scientists, the Internet reached a status where large-scale technical limitations impose rethinking its fundamentals. This refers to design aspects (flexibility, scalability, etc.), technical aspects (networking, routing, traffic, address limitation, etc), as well as economics (new business models, cost sharing, ownership, etc.). Evolving Internet poses architectural, design, and deployment challenges in terms of performance prediction, monitoring and control, admission control, extendibility, stability, resilience, delay-tolerance, and interworking with the existing infrastructures or with specialized networks.

We take here the opportunity to warmly thank all the members of the INTERNET 2017 Technical Program Committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to INTERNET 2017. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the INTERNET 2017 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that INTERNET 2017 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of the evolving internet.

We are convinced that the participants found the event useful and communications very open. We also hope that Nice provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful city.

INTERNET 2017 Chairs:

INTERNET Steering Committee

Eugen Borcoci, University "Politehnica" of Bucharest (UPB), Romania
Dirceu Cavendish, Kyushu Institute of Technology, Japan
Steffen Fries, Siemens AG, Germany
Terje Jensen, Telenor, Norway

Cristina Alcaraz, University of Malaga, Spain
Parimala Thulasiraman, University of Manitoba - Winnipeg, Canada
Wladyslaw Homenda, Warsaw University of Technology, Poland
Onur Alparslan, Osaka University, Japan

INTERNET Industry/Research Advisory Committee

Michael Bahr, Siemens AG Corporate Technology, Munich, Germany
Marcin Markowski, Wroclaw University of Science and Technology, Poland
Hanmin Jung, KISTI, Korea
Paolo Barattini, Kontor 46, Italy
Yung Ryn (Elisha) Choe, Sandia National Laboratories, Livermore, USA
Rob van Kranenburg, Founder of Council / Chair of AC4, Hyper Connected Society, The European Research Cluster on the Internet of Things
