

MOBILITY 2024

Forward

The Fourteenth International Conference on Mobile Services, Resources, and Users (MOBILITY 2024), held between April 14th and April 18th, 2024, continued a series of international events dedicated to mobility-at-large, dealing with challenges raised by mobile services and applications considering user, device, and service mobility.

Users increasingly rely on devices in different mobile scenarios and situations. "Everything is mobile", and mobility is now ubiquitous. Services are supported in mobile environments, through smart devices and enabling software. While there are well known mobile services, the extension to mobile communities and on-demand mobility requires appropriate mobile radios, middleware, and interfacing. Mobility management is becoming more complex but is essential for every business. Mobile wireless communications, including vehicular technologies, bring new requirements for ad hoc networking, topology control, and interface standardization.

We take here the opportunity to warmly thank all the members of the MOBILITY 2024 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to MOBILITY 2024. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the MOBILITY 2024 organizing committee for their help in handling the logistics of this event.

We hope that MOBILITY 2024 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of mobile services, resources, and users.

MOBILITY 2024 Chairs

MOBILITY 2024 Steering Committee

Lounis Adouane, Université de Technologie de Compiègne / Heudisayc, France

Omar Sami Oubbati, University of Laghouat, Algeria

MOBILITY 2024 Publicity Chairs

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain

José Miguel Jiménez, Universitat Politecnica de Valencia, Spain
