

PESARO 2019

Forward

The Ninth International Conference on Performance, Safety and Robustness in Complex Systems and Applications (PESARO 2019), held between March 24, 2019 and March 28, 2019 in Valencia, Spain, continued a series of events dedicated to fundamentals, techniques and experiments to specify, design, and deploy systems and applications under given constraints on performance, safety and robustness.

There is a relation between organizational, design and operational complexity of organization and systems and the degree of robustness and safety under given performance metrics. More complex systems and applications might not be necessarily more profitable, but are less robust. There are trade-offs involved in designing and deploying distributed systems. Some designing technologies have a positive influence on safety and robustness, even operational performance is not optimized. Under constantly changing system infrastructure and user behaviors and needs, there is a challenge in designing complex systems and applications with a required level of performance, safety and robustness.

We welcomed academic, research and industry contributions. The conference had the following tracks:

- Methodologies, techniques and algorithms
- Applications and services

We take here the opportunity to warmly thank all the members of the PESARO 2019 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to PESARO 2019. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also thank the members of the PESARO 2019 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that PESARO 2019 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the areas related to performance, safety and robustness in complex systems. We also hope that Valencia, Spain provided a pleasant environment during the conference and everyone saved some time to enjoy the historic charm of the city.

PESARO 2019 Chairs

PESARO Steering Committee

Wolfgang Leister, Norsk Regnesentral (Norwegian Computing Center), Norway

Mohammad Rajabali Nejad, University of Twente, the Netherlands

Omar Smadi, Iowa State University, USA

Yulei Wu, University of Exeter, UK

PESARO Industry/Research Advisory Committee

John Favaro, INTECS, Italy

Jean-Pierre Seifert, TU Berlin & FhG SIT Darmstadt, Germany

Roger Rivett, Jaguar Land Rover, UK

PESARO 2019 Special Tracks Chair

Lorena Parra, IMIDRA, Spain // Universitat Politecnica de Valencia, Spain
