# **SIMUL 2016**

## **Forward**

The Eighth International Conference on Advances in System Simulation (SIMUL 2016), held on August 21 - 25, 2016 in Rome, Italy, continued a series of events focusing on advances in simulation techniques and systems providing new simulation capabilities.

While different simulation events are already scheduled for years, SIMUL 2016 identified specific needs for ontology of models, mechanisms, and methodologies in order to make easy an appropriate tool selection. With the advent of Web Services and WEB 3.0 social simulation and humanin simulations bring new challenging situations along with more classical process simulations and distributed and parallel simulations. An update on the simulation tool considering these new simulation flavors was aimed at, too.

The conference provided a forum where researchers were able to present recent research results and new research problems and directions related to them. The conference sought contributions to stress-out large challenges in scale system simulation and advanced mechanisms and methodologies to deal with them. The accepted papers covered topics on social simulation, transport simulation, simulation tools and platforms, simulation methodologies and models, and distributed simulation.

We welcomed technical papers presenting research and practical results, position papers addressing the pros and cons of specific proposals, such as those being discussed in the standard forums or in industry consortiums, survey papers addressing the key problems and solutions on any of the above topics, short papers on work in progress, and panel proposals.

We take here the opportunity to warmly thank all the members of the SIMUL 2016 technical program committee as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and efforts to contribute to the SIMUL 2016. We truly believe that thanks to all these efforts, the final conference program consists of top quality contributions.

This event could also not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the SIMUL 2016 organizing committee for their help in handling the logistics and for their work that is making this professional meeting a success. We gratefully appreciate to the technical program committee co-chairs that contributed to identify the appropriate groups to submit contributions.

We hope the SIMUL 2016 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in simulation research. We also hope Rome provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful historic city.

#### **SIMUL 2016 Advisory Committee**

Christoph Reinhart, Harvard University - Cambridge, USA Amr Arisha, College of Business, DIT, Ireland

#### **SIMUL 2016 Research Liaison Chairs**

Tae-Eog Lee, KAIST, Korea Marko Jaakola, VTT Technical Research Centre of Finland, Finland

## **SIMUL 2016 Industry Liaison Chairs**

Shengnan Wu, American Airlines, USA Tejas R. Gandhi, Virtua Health-Marlton, USA

## **SIMUL 2016 Special Area Chairs**

## **Model-based system prediction**

Georgiy Bobashev, RTI International -Research Triangle Park, USA Aida Omerovic, SINTEF & University of Oslo, Norway

#### **Process simulation**

Ian Flood, University of Florida, USA Gregor Papa, Jozef Stefan Institute - Ljubljana, Slovenia

## **SIMUL 2016 Publicity Chairs**

Nuno Melão, Polytechnic Institute of Viseu, Portugal
