

Table of Contents

The Role of Artificial Intelligence and Machine Learning in Predictive Health Care, Diagnostics, and Personalized Treatment for Seniors <i>Rudiger Hofert and Wolfgang Bench</i>	1
CAD Tool for Breast Cancer Prediction Using Multiple Deep-learning Models <i>Maura Mengoni, Luca Girdali, Aubudukaiyoumu Talipu, Giampiero Cimini, Marco Luciani, and Mauro Savino</i>	5
Human-AI Collaboration Cycle in the Development Stage of an AI-enabled System <i>Pi-Yang Weng, Rua-Huan Tsaih, and Hsin-Lu Chang</i>	12
Can We Explain AI?: Explainable AI in the Health Domain as Told Through Three European Commission-funded Projects <i>Lem Ngongalah and Robin Renwick</i>	17
Cancer: Investigating the Impact of the Implementation Platform on Machine Learning Models <i>Adedayo Olowolayemo, Amina Souag, and Konstantinos Sirlantzis</i>	20
Predictive Analytics for Emergency Department Visits Based on Local Short-Term Pollution and Weather Exposure <i>Isabella Della Torre, Ismaela Avellino, Francesca Marinaro, Andrea Buccoliero, and Antonio Colangelo</i>	29
Medical Knowledge Harmonization: A Graph-based, Entity-Selective Approach to Multi-source Diagnoses <i>Andrea Bianchi and Antinisca Di Marco</i>	35
Evaluating Text Pre-Processing Strategies for Clinical Document Classification with BERT <i>Sarah Miller, Serge Sharoff, Geoffrey Hall, and Prabhu Arumugam</i>	41
ChatGPT's Accuracy in Answering the National Medical Licensing Examination in Japan <i>Takayuki Nakano</i>	47
Priming Large Language Models for Personalized Healthcare <i>Madhurima Vardhan, Deepak Nathani, Swarnima Vardhan, and Abhinav Aggarwal</i>	52
Efficacy of an AI-Based Weight Loss Digital Therapeutics Platform: A Multidisciplinary Perspective <i>Sarfraz Khokhar, John Holden, Catherine Toomer, and Linda Whitby</i>	54
