

Table of Contents

Matroska Feature Selection Method for Microarray Data <i>Shuichi Shinmura</i>	1
In Vivo Single-Molecule Dynamics of Transcription of the Viral T7 Phi 10 Promoter in Escherichia coli <i>Nadia S. M. Goncalves, Leonardo Martins, Huy Tran, Samuel M.D. Oliveira, Ramakanth Neeli-Venkata, Jose M. Fonseca, and Andre S. Ribeiro</i>	9
Effect of Nasal High Flow Therapy on CO2 Tension - Physico-mathematical Modelling <i>Cletus Adams, Mark Jermy, Patrick Geoghegan, and Callum Spence</i>	16
Using a Synthetic Probe to Study the Robustness of the Segregation Process of Protein Aggregates in Escherichia coli <i>Andre Ribeiro and Samuel Oliveira</i>	21
Computational Analysis of the Linear Motif Mediated Subversion of the Human Protein Synthesis Machinery <i>Andres Becerra Sandoval, Victor Andres Bucheli Guerrero, and Pedro Antonio Moreno Tovar</i>	23
BioGraphDB: A New graphDB Collecting Heterogeneous Data for Bioinformatics Analysis <i>Antonino Fiannaca, Massimo La Rosa, Laura La Paglia, Antonio Messina, and Alfonso Urso</i>	28
Automated Identification of Molecular Structures for NMR Based Metabolomics <i>Arianna Filntisi, Pantelis Asvestas, Charalambos Fotakis, Panagiotis Zoumpoulakis, George K. Matsopoulos, and Dionisis Cavouras</i>	35
