

Table of Contents

Running Hydraulics Simulations at Scale Using Inductiva Python API <i>Luis Sarmiento, Hugo Penedones, Sergio Santos, and Paulo Barbosa</i>	1
A Multiple-Location Modeling Scheme for Physics-Regularized Networks: Recurrent Forecasting of Fixed-Location Buoy Observations <i>Elias Sandner, Austin Schmidt, Pujan Pokhrel, Elias Ioup, David Dobson, Christian Guetl, and Mahdi Abdelguerfi</i>	3
Physics-Regularized Buoy Forecasts: A Multi-Hyperparameter Approach Using Bounded Random Search <i>Austin Schmidt, Pujan Pokhrel, Md Meftahul Ferdous, Mahdi Abdelguerfi, Elias Ioup, and David Dobson</i>	14
Development of an Acoustic Antenna for Event Triggering in KM3NeT <i>Miguel Ardid, Salva Ardid, Victor Espinosa, Alicia Herrero, Carlos D. Llorens, Carlos Quiroz-Rangel, Manuel Bou-Cabo, and Guillermo Lara</i>	23
