

Table of Contents

Tactical Applications of Heterogeneous Ad Hoc Networks – Cognitive Radios, Wireless Sensor Networks and COTS in Networked Mobile Operations <i>Marko Suojanen and Jari Nurmi</i>	1
A Survey of Cognitive Radio Management Functions <i>Ola A. Mohammed, Khalil El-Khatib, and Miguel V. Martin</i>	6
Spectrum Leasing Game for Underlay Cognitive Ratio Network with Primary System Using Adaptive Rate-Based Pricing Strategy <i>Wenson Chang, Yu-Ping Lin, and Szu-Lin Su</i>	14
Hybrid Approach Analysis of Energy Detection and Eigenvalue Based Spectrum Sensing Algorithms with Noise Power Estimation <i>Pawan Dhakal, Daniel Riviello, Roberto Garello, and Federico Penna</i>	20
Software-Defined Radio for Spectrum Sensing Using Independent Component Analysis <i>Paulo Ixtanio Leite Ferreira Ferreira, Glauco Fontgalland, Bruno Albert, and Edmar Gurjao</i>	26
FBMC/COQAM: An Enabler for Cognitive Radio <i>Hao Lin and Pierre Siohan</i>	30
Communication Patterns: a Novel Modeling Approach for Software Defined Radio Systems <i>Andrea Enrici, Ludovic Aprville, and Renaud Pacalet</i>	35
