

## Table of Contents

Artificial Intelligence and Semiotics: Using Semiotic Learning to Bolster AI <i>Joshua Sipper</i>	1
Graceful Degradation under Attack: Adapting Control Device Operation Depending on the Current Threat Exposure <i>Rainer Falk, Christian Feist, and Steffen Fries</i>	9
Analysing Cyber Challenges: Towards Enhancing Autonomous Vehicle Cybersecurity Resilience <i>Tanisha Soldini, Elena Sitnikova, and Karl Sammut</i>	13
Poisoning Attack Data Detection with Internal Coefficient Displacement for Machine Learning Based NIDS <i>Hajime Shimada, Takuya Kuwayama, Hirokazu Hasegawa, and Yukiko Yamaguchi</i>	19
Towards Automated Checking of GDPR Compliance <i>Pauline Di Salvo-Cilia, Alba Martinez Anton, and Clara Bertolissi</i>	25
CAN Message Collision Avoidance Filter for In-Vehicle Networks <i>Uma Kulkarni and Sibylle Froeschle</i>	28
Prepare for the Worst, Rather Than Hope for the Best: Preparing to Recover From Major Cyber Security Incidents <i>Anne Coull</i>	31
GenAttackTracker: Real-Time SCADA-based Cyber Threat Detection Through Scoring and Bayesian Model Integration <i>Fatemeh Movafagh and Uwe Glasser</i>	38
