

Table of Contents

| | |
|--|----|
| Towards Virtual Fault-based Attacks for Security Validation <i>Regis Leveugle, Mohamed Ben Jrad, and Paolo Maistri</i> | 1 |
| On Time, Conflict, Weighting, and Dependency Aspects of Assessing the Trustworthiness of Digital Records <i>Jianqiang Ma, Habtamu Abie, Torbjorn Skramstad, and Mads Nygard</i> | 7 |
| Specification and Verification of the Triple-Modular Redundancy Fault Tolerant System using CSP <i>Tan Lanfang, Tan Qingping, and Li Jianli</i> | 14 |
| Efficient and scalable steady-state dependability verification <i>Diana El Rabih and Nihal Pekergin</i> | 18 |
| A Dependable Microcontroller-based Embedded System <i>Amir Rajabzadeh and Mahdi Vosoughifar</i> | 24 |
| Dependable Ordering Policies for Distributed Consistent Systems <i>Matei Dobrescu, Manuela Stoian, and Cosmin Leoveanu</i> | 30 |
| Fuzzy Event Assignment for Robust Context-Aware Workflows <i>Hannes Wolf, Jonas Palauro, and Klaus Herrmann</i> | 37 |
| An Automated Wrapper-based Approach to the Design of Dependable Software <i>Matthew Leeke and Arshad Jhumka</i> | 43 |
| An Approach for the Reliability Analysis of Automotive Control Systems <i>Mikhail Glukhikh, Mikhail Moiseev, and Harald Richter</i> | 51 |
| Methodology and Experience for Designing Safety-Related Systems in IEC 61508 <i>Zhe Chen and Gilles Motet</i> | 57 |
| Supporting Synthetic Data-Driven Diagnosis through Automated Fault-Injection <i>Patrick E. Lanigan, Thomas E. Fuhrman, and Priya Narasimhan</i> | 65 |
| On Methods for the Formal Specification of Fault Tolerant Systems <i>Manuel Mazzara</i> | 72 |
| Failure Modes and Effect Analysis of Use Cases: A Structured Approach to Engineering Fault Tolerance Requirements <i>Elena Troubitsyna</i> | 82 |

| | |
|--|-----|
| Timing Failures Caused by Resource Starvation in Virtual Machines <i>Sune Jakobsson</i> | 88 |
| Video Surveillance in the Cloud: Dependability Analysis <i>Aleksandra Karimaa</i> | 92 |
| Diagnostic Fusion for Dependable Vehicle Architectures <i>Patrick E. Lanigan, Priya Narasimhan, and Thomas E. Fuhrman</i> | 96 |
| Downtime Analysis of Virtual Machine Live Migration <i>Felix Salfner, Peter Troger, and Andreas Polze</i> | 100 |
