

Table of Contents

Enabling Distributed Meter Data Management Using Mediation System <i>Nipun Sharma and Sandeep Akhouri</i>	1
An Open Data-Based Discrete Simulation Environment for testing Smart Grid Messaging <i>Eric MSP Veith, Bernd Steinbach, and Jurgen Otten</i>	7
Multi-Protocol Transport Layer QoS: A Performance Analysis for The Smart Grid <i>James Wilcox, Dritan Kaleshi, and Mahesh Sooriyabandara</i>	13
EnAware: A Comprehensive and Scalable Energy Management and Awareness Solution <i>Antonio Santos, Carlos Resende, Rui Marques, and Andre Lima</i>	19
Fit for Solar Power - Computer-Assisted Planning of Regional Power Grids <i>Thomas Rist and Michael Wiest</i>	25
Evaluating Power-Performance Benefits of Data Compression in HPC Storage Servers <i>Konstantinos Chasapis, Manuel F. Dolz, Michael Kuhn, and Thomas Ludwig</i>	29
Fostering Energy Awareness in Residential Homes using Mobile Devices <i>Florian Reinhart, Kevin Schlieper, Michael Kugler, Elisabeth Andre, Masood Masoodian, and Bill Rogers</i>	35
Smart Houses for Energy Efficiency and Carbon Dioxide Emission Reduction <i>Jean-Nicolas Louis, Antonio Calo, and Eva Pongracz</i>	44
Energy-Efficient Heterogeneous Cluster and Migration <i>Jukka Kommeri and Tapio Niemi</i>	51
On the Use of Remote GPUs and Low-Power Processors for the Acceleration of Scientific Applications <i>Adrian Castello, Jose Duato, Rafael Mayo, Antonio J. Pena, Enrique S. Quintana-Orti, Vicente Roca, and Federico Silla</i>	57
Analysis of Novel Random Neural Network Controller for Residential Building Temperature Control <i>Abbas Javed, Hadi Larijani, Ali Ahmadiania, and Rohinton Emmanuel</i>	63
Flow-based Routing Schemes for Minimizing Network Energy Consumption using OpenFlow <i>Shota Oda, Daiki Nobayashi, Yutaka Fukuda, and Takeshi Ikenaga</i>	69
Keeping High Availability of Connected End-point Devices in Smart Grid <i>Hiroshi Isozaki, Jun Kanai, Shunsuke Sasaki, and Shintarou Sano</i>	73

Concerning the Sustainability of Smart Grids <i>Antonio Calo, Jean-Nicolas Louis, and Eva Pongracz</i>	81
Energy Management in a Smart Grid-integrated Hydrogen-based Storage <i>Diego Arnone, Alessandro Rossi, Massimo Bertoncini, Rosario Proietto, Diana Moneta, Giuseppe Tondi, and Carlos Garcia-Santiago</i>	86
Smart Grid Architectures and the Multi-Agent System Paradigm <i>Cagri Yilmaz, Sahin Albayrak, and Marco Lutzenberger</i>	90
