Table of Contents

Application of InSAR Method to Estimate the Surface Deformation of the May Embankment Dam,Turkey 1
Rouhollah Nasirzadehdizaji and Anil Olgac

Geo-processing Approaches for Urban Water Supply and Drainage Systems' Data Rehabilitation 7
Cagri Cimen, Suleyman Canberk Tuskan, and Anil Olgac

Development of a Web-Based Geospatial Application for Efficient Spatial Data Management 13
Rouhollah Nasirzadehdizaji and Anil Olgac

Development of Data Quality Improvement Method for Hydrodynamic Model of Urban Drainage System Using GIS Capabilities 19
Cagri Cimen, Anil Olgac, and Rouhollah Nasirzadehdizaji

Graph Neural Network for Accurate and Low-complexity SAR ATR 25
Bingyi Zhang, Sasindu Wijeratne, Rajgopal Kannan, Viktor Prasanna, and Carl Busart

Detecting Wildfires Using Unmanned Aerial Vehicle with Near Infrared Optical Imaging Sensor 31
Edwin Magidimisha, Seelen Naidoo, Zimbini Faniso-Mnyaka, and Muhammad Nana

Dynamic Integration of Climate Properties with Geospatial Data for Energy Applications 37
Lassi Lehto and Jaakko Kahkonen

Visualization System for the Positioning of Sunken Vessels Using Underwater Acoustic Devices 41
Dohyeong Km, Sang-Hyeok Nam, Jongryong Choi, and Donguoon Kim

User-Generated Voice Navigation Editing System Using Block-Type Visual Programming Language 44
Daisuke Yamamoto, Hiroki Sekiya, and Shinsuke Kajioka

Spatial Data Analysis as Decision Support Aimed at the Improvement of Agricultural Fertilization Strategies 51
Hardy Pundt, Roksolana Pleshkanovska, Denise Assmann, Falk Bottcher, Enrico Thiel, Johannes Dohler, Florian Eissner, Thomas Kreuter, Oliver Spott, and Michael Grunert

A Method for Removing Shadows from Photos Taken with a Drone and Stitching the Photos Together 56
YuJie Wu, Megumi Wakao, Naoki Morita, and Kenta Morita

Indoor/Outdoor Route Estimation Method Based on Global Map Matching Using BLE Beacons and GPS 61
Shinsuke Kajioka, Takanori Saito, and Daisuke Yamamoto

Autonomous Drone Landing in 3D Urban Environment Using Real-Time Visibility Analysis 67
Oren Gal and Yerach Doytsher

Identifying and Visualizing Older Single-Family House Areas for a Sustainable Spatial Planning 73
Dominik Visca, Max Hoppe, Kevin Kaminski, and Pascal Neis

Towards Accurate Traceability of Water Reaching the Reservoirs 79
Lidia Ortega, Maria Isabel Ramos, and Angel Calle

Terrestrial Laser Scanner High Station to Control the Quality of DEM Data 83
Juan-Francisco Reinoso-Gordo, Francisco-Javier Ariza-Lopez, Antonio Mozas-Calvache, Jose-Luis Garcia-Balboa, and Juan-Jose Ruiz-Lendinez

Using a Social Network for Road Accidents Detection, Geolocation and Notification - A Machine Learning Approach 86
Samuel Pereira de Vasconcelos, Claudio De Souza Baptista, and Hugo Feitosa de Figueiredo

NodeGIS: A Container-based Web GIS Application Development Tool 92
Mateus Queiroz Cunha and Claudio De Souza Baptista

Advanced Contextualisation Reference Implementation Frameworks in Practice: Coherent Multi-disciplinary Conceptual Knowledge-Spatial Context Discovery Results from the Holocene-prehistoric Volcanological Features and Archaeological Settlement Infrastructu 98
Claus-Peter Ruckemann

Evaluating the Quality of Authoritative Linked Data Models 104
Hanan Muhajab and Alia Abdelmoty

SodaSense: An Intelligence Platform for Micro-Mobility, Micro-Climate and Agriculture 107
Paraskevi Raftopoulou, Spiros Skiadopoulos, Christos Tryfonopoulos, and Costas Vassilakis

The Role of Food Sharing Applications (FSAs) in Supporting Food Waste Mitigation in Cities – Examples from Poland and Czechia 109
Magdalena Paczek, Mateusz Rusin, Filip Bolicki, Daniel Straub, and Magdalena Kubal-Czerwinska
