

Table of Contents

Support Vector Machine Learning in Multi-Robot Teams <i>Nicol Naidoo and Glen Bright</i>	1
Intelligent Project Management and Automation Systems <i>Bin Ling, Yanyan Yang, David Ndzi, and Min Gao</i>	7
Method for Parameter Adjustment for Automated Visual Inspection of Bottled Liquids <i>Irina Topalova</i>	15
Estimation of Time to Contact from Blurred Images <i>Yukitada Takanashi and Kazuyuki Ito</i>	20
A Round-Trip Engineering Method for Activity Diagrams and Source Code <i>Keinosuke Matsumoto, Ryo Uenishi, and Naoki Mori</i>	24
Platform for Autonomous Service Composition <i>Krasimir Baylov, Dessislava Petrova-Antonova, and Aleksandar Dimov</i>	30
Balancing Centralised Control with Vehicle Autonomy in AGV Systems for Industrial Acceptance <i>Markus Bader, Andreas Richtsfeld, Markus Suchi, George Todoran, Wolfgang Holl, and Markus Vincze</i>	37
Model-Driven Architecture for Self-Adaptive Context-Aware Message Routing in Pervasive Environments <i>Nachoua Guizani and Jocelyne Fayn</i>	44
CObAPAS: Combinatorial Optimization based Approach for Autonomic Systems <i>Pedro do Prado, Luis Nakamura, Marcos Santana, Regina Santana, and Omar Cortes</i>	51
Self-organized Architecture for Sharing Data Streams at Large Scale <i>Nicolas Hidalgo and Erika Rosas</i>	57
Autonomic Metaheuristic Optimization with Application to Run-Time Software Adaptation <i>John M. Ewing and Daniel A. Menasce</i>	63
Efficient Management of Cooling Systems in Green Datacenters <i>Ibrahim Safieddine and Noel De Palma</i>	73
On the Adoption of Multi-Agent Systems for the Development of Industrial Control Networks: A Case Study <i>Hosny Abbas, Mohammed Amin, and Samir Shaheen</i>	77
Application Design and Profiling of Stream Processing	86

Veronica Gil-Costa, Jair Lobos, and Mauricio Marin

Human Friendly Autonomous Robot using Dempster-Shafer Sensor Fusion and Velocity Potential Field Control 92
Dan Necsulescu, Yu Hu, and Jurek Sasiadek

Enhancing Data Security in Cloud Computing Using a Lightweight Cryptographic Algorithm 98
Sana Belguith, Abderrazak Jemai, and Rabah Attia

Supporting the Neon and VFP Instruction Sets in an LLVM-based Binary Translator 104
Yu-Chuan Guo, Wu Yang, Jiunn-Yeu Chen, and Jenq-Kuen Lee

Secure Information and Services Management in the Cloud 110
Marek R. Ogiela, Lidia Ogiela, and Urszula Ogiela

Hybrid Autonomous Navigation System Using a Dynamic Fuzzy Cognitive Maps Evolution 114
Marcio Mendonca, Lucia Valeria R. Arruda, Ivan Rossato Chrun, and Esdras Salgado da Silva

Effective Interaction in Asynchronous Multi-Agent Environments for Supply Scheduling in Real-Time 120
Alexander Tsarev, Petr Skobelev, and Dmitry Ochkov

On The Topological Entropy of Continuous-Time Polytopic Systems 126
Graziano Chesi

Task-Space Torque Controller Based on Time-Delay Control 128
Sung-moon Hur, Joonhee Jo, and Yonghwan Oh

Context-Aware Authentication for the Internet of Things 134
Kashif Habib and Wolfgang Leister
