Table of Contents

Towards Migration of User Profiles in the SONIC Online Social Network Federation 1
Sebastian Gondor, Felix Beierle, Evren Kucukbayraktar, Hussam Hebbo, Senan Sharhan, and Axel Kupper

Active Intrusion Management for Web Server Software: Case WordPress 6
Patrik Paarnio, Sam Stenvall, Magnus Westerlund, and Goran Pulkkis

Idea for Location and Detection of Fiber Cuts in PON 13
Mary Luz Mouronte Lopez

Security Implications of Software Defined Networking in Industrial Control Systems 17
Gyorgy Kalman

An Authorisation and Access Control Framework for Information Sharing on the Semantic Web 23
Owen Sacco and John G. Breslin

Facial Part Effects Analysis using Emotion-evoking Videos: Smile Expression 30
Kazuhito Sato, Momoyo Ito, Hirokazu Madokoro, and Sakura Kadowaki

A Color Constancy Model for Non-uniform Illumination based on Correlation matrix 40
Takashi Toriu, Mikiya Hironaga, Hiroshi Kamada, and Thi Thi Zin

A Semantic Representation for Process-Oriented Knowledge Management to support Production Planning based on Function Block Domain Models and a Three-level Mediator Architecture 47
Benjamin Gernhardt, Franz Miltner, Tobias Vogel, Holger Brocks, Matthias Hemmje, and Lihui Wang

On The Idle Time Model In Computer Networks 60
Saulius Minkevicius and Edvinas Greicius

Application of a Models Integration Module to the Cutting Slabs Problem in a Continuous Casting Machine 65
Konstantin Aksyonov, Anna Antonova, Elena Smoliy, Eugene Sysoletin, and Alexei Sheklein

An Idea On Infinite Horizon Decision Support For Rule-based Process Models 73
Michaela Baumann, Michael Heinrich Baumann, and Stefan Jablonski

Integrating Crime Data by the Use of Generic Data Models 76
Dirk Frosch-Wilke and Lennard Scheffler

Finding Potential Threats in Several Security Targets for Eliciting Security Requirements 83
Haruhiko Kaiya, Shinpei Ogata, Shinpei Hayashi, Motoshi Saeki, Takao Okubo, Nobukazu Yoshioka, Hironori Washizaki, and Atsuo Hazeyama

Using ODA Method and FOIL Algorithm to Determine Organizational Agility Level 93
Gusts Linkevics and Uldis Sukovskis

Optimising Development Process and Software Maturity through eScience Partnerships 101
Dieter Kranzlmuller and Matti Heikkurinen

Health Professional Students' Acceptance of Mobile Information Communication Technologies for Learning - a Study Using the Unified Theory of Acceptance and Use of Technology (UTAUT) 108
Lili Liu, Shaniff Esmail, Elizabeth Taylor, Adriana Maria Rios Rincon, and Antonio Miguel Cruz

Web Service Selection Based on Integrated QoS Assesment 114
Olga Georgieva and Dessislava Petrova-Antonova

Does the Integration of the Concept of Rapid Instructional Design in Project Management Approaches Support the Efficient Realisation of E-learning Projects? 119
Michal Kuciapski

On Behavioral Process Model Similarity Matching: A Centroid-based Approach 125
Michaela Baumann, Michael Heinrich Baumann, and Stefan Jablonski

Energy-Efficient Thread Migration via Dynamic Characterization of Resource Utilization 132
Claudia Alvarado,, Dan Tamir, and Apan Qasem

Evaluating Neural Network Methods for PMC-based CPU Power Prediction 138
Mario Gutierrez, Dan Tamir, and Apan Qasem

Evaluation of Heuristic Algorithms for Solving a Transportation Problem 144
Kacper Rychard, Iwona Pozniak-Koszalka, Dawid Zydek, Leszek Koszalka, and Andrzej Kasprzak
