

## Table of Contents

Detecting Malicious Mobile Applications in Android OS <i>Sun Teck Tan and Choon Rui Tan</i>	1
A Two-Tiered User Feedback-based Approach for Spam Detection <i>Malik Feroze, Zubair Baig, and Michael Johnstone</i>	12
Supporting a Variety of Secure Services Based on MTM <i>Seungyong Yoon, Yongsung Jeon, and Jeongnyeo Kim</i>	18
Implementation of Netflow based Interactive Connection Traceback System <i>Ik-Kyun Kim and Koo-Hong Kang</i>	21
Conducting and Identifying Penetration Attacks Using Linux Based Systems <i>Aparicio Carranza, German Calle, Gin Pena, Jose Camacho, Harrison Carranza, and Yeraldina Estrella</i>	27
Adaptive Bitstream Prioritization for Dual TCP/UDP Streaming of HD Video <i>Arul N Dhamodaran, Mohammed Sinky, and Ben Lee</i>	35
Jitter Analysis of LTE Traffic over MPLS Based Evolved Packet Core Network <i>Hussien Mahmoud and Hussein Elsayed</i>	41
Choosing Multicast Configuration with Forward Error Correction for Mobile Multiaccess Heterogeneous Users <i>Svetlana Boudko and Wolfgang Leister</i>	47
Classification of Node Localization Techniques in Wireless Sensor Networks <i>Mekelleche Fatiha and Haffaf Hafid</i>	51
Development of an IoT-based System for Real Time Occupational Exposure Monitoring <i>Houssem Eddine Fathallah, Vincent Lecuire, Eric Rondeau, and Stephane Le Calve</i>	57
Fault-Tolerant Breach-Free Sensor Networks <i>Jorge Cobb and Chin-Tser Huang</i>	63
Performance Analysis of Association Procedure in IEEE 802.11ah <i>Pranesh Sthapit, Santosh Subedi, Goo-Rak Kwon, and Jae-Young Pyun</i>	70
Secure Dynamic Access Control Mechanism for Shared Wireless Sensor Networks <i>Nelka Perera, Kasun Zoysa, Jeevani Goonathillake, and Asanka Sayakkara</i>	74
CAMAW: A Clustering Algorithm for Multiple Applications in WSN	81

<i>Elton Alves da Costa, Claudio Miceli de Farias, Luci Pirmez, and Flavia Coimbra Delicato</i>	
Intelligent Vehicular Security System using Sensors and GPS <i>Ahmed Zuhair, Mansoor Ali, and Ali Al-Humairi</i>	90
A k-Resilient Node Deployment Scheme Using an Air Vehicle in Wireless Sensor Networks <i>Daehee Kim and Sunshin An</i>	96
Efficient Partial Decoding Algorithm for High Efficiency Video Coding <i>Dokyung Lee and Jechang Jeong</i>	99
Categorization of Technologies used for Fingerprint-Based Indoor Localization <i>Mario Melo and Gibeon Aquino</i>	103
SDL Implementation of LTE UE Non-Seamless Random Access Procedure Handling <i>Mohamed Yousef, Hussein Elsayed, and Abdelhalim Zekry</i>	109
Bulk Data Transfers through an Airline Delay-Tolerant Network <i>Christina M. Malliou, Nikolaos Bezirgiannidis, and Vassilis Tsaoussidis</i>	120
Intelligence-based Routing for Smarter and Enhanced Opportunistic Network Operations <i>Bassem Mokhtar and Mostafa Mokhtar</i>	126
An Experimental Study of RFID Adoption for Maritime Activities <i>Yasuhiro Sato, Akira Nishikiyama, Kohei Shimada, and Yoshinori Matsuura</i>	133
Comparing TCP Congestion Control Algorithms Based on Passively Collected Packet Traces <i>Toshihiko Kato, Atsushi Oda, Celimuga Wu, and Satoshi Ohzahata</i>	135
Middleware Architectures for RFID Systems: A Survey <i>Haitham Hamza, Mohamed Maher, Shourok Alaa, Aya Khattab, Hadeal Ismail, and Kamilia Hosny</i>	142
A Novel Path Computing Framework under QoX Constraints Based on N&PV Functions Embedding. <i>Xavier Hesselbach, Juan Felipe Botero, and Jose Roberto Amazonas</i>	150
