

Table of Contents

IoTSEAR: A System for Enforcing Access Control Rules with the IoT <i>Andreas Put and Bart De Decker</i>	1
Enabling Defensive Deception by Leveraging Software Defined Networks <i>Ilias Belalis, Georgios Kavallieratos, Vasileios Gkioulos, and Georgios Spathoulas</i>	7
Handoff Characterization of Multipath Video Streaming <i>Dirceu Cavendish, Kazuya Fujiwara, Shinichi Nagayama, Daiki Nobayashi, and Takeshi Ikenaga</i>	17
Loop Users in: The Key to Cross-platform Data Interoperability. <i>Han Su, Liyang Zhu, Boyan Xu, Jialing Wu, Lifeng Liu, Yingxuan Zhu, and Jian Li</i>	23
Efficient Intrusion Detection Using Evidence Theory <i>Islam Debicha, Thibault Debatty, Wim Mees, and Jean-Michel Dricot</i>	28
Identification of Fake Profiles in Twitter Social Network <i>Mario Antunes, Hugo Baptista, and Baltazar Rodrigues</i>	33
An Intelligent Energy-driven System Of Mobile Health Management For Pets And Animals <i>Jialing Wu, Yingxuan Zhu, Lifeng Liu, Han Su, Yinzhao Chen, and Jian Li</i>	37
Comparison of a Supervised Trained Neural Network Classifier and a Supervised Trained Aggregation Function Classifier <i>Alexandre Croix, Thibault Debatty, and Wim Mees</i>	41
Why Multipath TCP Degrades Throughput under Insufficient Send Socket Buffer and Differently Delayed Paths <i>Toshihiko Kato, Adhikari Divakar, Ryo Yamamoto, and Satoshi Ohzahata</i>	48
Location Privacy Preservation of Vehicle Data in Internet of Vehicles <i>Ying Ying Liu, Austin Cooke, and Parimala Thulasiraman</i>	54
Evaluation of a Multi-agent Anomaly-based Advanced Persistent Threat Detection Framework <i>Georgi Nikolov, Thibault Debatty, and Wim Mees</i>	61
