

Table of Contents

Improving Speech Emotion Recognition Based on ToBI Phonological Representation <i>Lingjie Shen and Wei Wang</i>	1
How an Optimized DB-SCAN Implementation Reduces Execution Time and Memory Requirements for Large Data Sets <i>Ole Kristian Ekseth and Svein-Olaf Hvasshovd</i>	6
Finding and Implementing Patterns for Creative Spaces <i>Christian Kohls</i>	12
Automatic Construction of Image Data Set Using Query Expansion Based on Tag Information <i>Yuki Mizoguchi, Takahiro Yoshimura, Yuji Iwahori, and Ryosuke Yamanishi</i>	18
Automatic Construction of Large Scale Image Data Set from Web Using Ontology and Deep Learning Model <i>Takahiro Yoshimura, Yuki Mizoguchi, Yuji Iwahori, and Ryosuke Yamanishi</i>	21
Colon Blood Vessel Detection Based on U-net <i>Hiroyasu Usami, Yuji Iwahori, Naotaka Ogasawara, and Kunio Kasugai</i>	23
Control Transition Interfaces in Level 3 Automated Vehicles: Four Preliminary Design Patterns <i>Alexander G. Mirnig and Manfred Tscheligi</i>	25
Massively Parallel Optical Flow using Distributed Local Search <i>Abdelkhalek Mansouri, Jean-Charles Creput, Fabrice Lauri, and Hongjian Wang</i>	31
Improved Gas Detection Algorithm for FTIR-Based Hyperspectral Imaging System Using Normalized Matched Filter <i>Hyeong-Geun Yu, Jae-Hoon Lee, Dong-Jo Park, Hyeon-Woo Nam, and Byeong-Hwang Park</i>	37
Evolvable Documents – an Initial Conceptualization <i>Marek Suchanek and Robert Pergl</i>	39
On the Variability Dimensions of Normalized Systems Applications: Experiences from an Educational Case Study <i>Peter De Bruyn, Herwig Mannaert, and Philip Huysmans</i>	45
On the Evolvability of Code Generation Patterns: The Case of the Normalized Systems Workflow Element <i>Herwig Mannaert, Peter De Bruyn, Koen De Cock, and Tim Van Waes</i>	51
