

Table of Contents

Lightweight Detection of Spamming Botnets <i>Masaru Takesue</i>	1
Detecting & Defeating Split Personality Malware <i>Kalpa Vishnani, Alwyn R. Pais, and Radhesh Mohandas</i>	7
Proposal of n-gram Based Algorithm for Malware Classification <i>Abdurrahman Pektas, Mehmet Eris, and Tankut Acarman</i>	14
Protecting Remote Component Authentication <i>Rainer Falk and Steffen Fries</i>	19
Extended Fault Based Attack against Discrete Logarithm Based Public Key Cryptosystems <i>Sung-Ming Yen and Chi-Dian Wu</i>	25
Implementations of Block Cipher SEED on Smartphone Operating Systems <i>HwanJin Lee, DongHoon Shin, and Hyun-Chul Jung</i>	31
An Approach for Enhancing the Security of Remotely Accessible, Sensitive Services with On-Site Monitoring <i>Tuomas Kekkonen and Teemu Kanstren</i>	36
Toward Engineering of Security of Information Systems: The Security Acts <i>Wilson Goudalo</i>	44
Establishing Authentication Trust in Open Environment Using Social Approach <i>Hidehito Gomi</i>	51
Migration towards a more secure authentication in the Session Initiation Protocol <i>Lars Strand, Wolfgang Leister, and Alan Duric</i>	57
PASER: Position Aware Secure and Efficient Route Discovery Protocol for Wireless Mesh Networks <i>Mohamad Sbeiti, Andreas Wolff, and Christian Wietfeld</i>	63
Reliability and Survivability of Wireless Sensor Network Using Security Adaptation Reference Monitor (SARM) <i>Tewfiq El Maliki and Jean-Marc Seigneur</i>	71
Federated Identity Management for Android <i>Anders Fongen</i>	77
A Scalable Architecture for Countering Network-Centric Insider Threats	83

Faisal M. Sibai and Daniel A. Menasce

A Framework for Protocol Vulnerability Condition Detection 91
Yuxin Meng and Lam for Kwok

Access Control in BitTorrent P2P Networks Using the Enhanced Closed Swarms Protocol 97
Vladimir Jovanovikj, Dusan Gabrijelcic, and Tomaz Klobucar

Enhancing System-Called-Based Intrusion Detection with Protocol Context 103
Anyi Liu, Xuxian Jiang, Jing Jin, Feng Mao, and Jim Chen

StegoWeb: Towards the Ideal Private Web Content Publishing Tool 109
Tamas Besenyei, Adam Mate Foldes, Gabor Gyorgy Gulyas, and Sandor Imre

End User Computing Environments for Improved Information Security 115
Pankaj Goyal

Using Avatars for Improved Authentication with Challenge Questions 121
Nicholas Micallef and Mike Just

Application of Scenario-driven Role Engineering to the MinaBASE Process Knowledge Database 125
Daniel Kimmig, Andreas Schmidt, Klaus Bittner, and Markus Dickerhof
