Identifying Suitable Attributes for Security and Dependability Metrication 1
Erland Jonsson and Laleh Pirzadeh

Risk-based Dynamic Access Control for a Highly Scalable Cloud Federation 8
Daniel Ricardo dos Santos, Carla Merkle Westphall, and Carlos Becker Westphall

Towards a Policy-Framework for the Deployment and Management of Cloud Services 14
Tim Waizenegger, Matthias Wieland, Tobias Binz, Uwe Breitenbuecher, and Frank Leymann

Implementation of Trust Metrics in X.509 Public Key Infrastructure 19
Lucas Martins and Ricardo Custodio

Secure and Fast PIN-entry Method for 3D Display 26
Mun-Kyu Lee and Hyeonjin Nam

Privacy-Preserving SVM Classification using Non-metric MDS 30
Khaled Alotaibi and Beatriz de la Iglesia

Security and Confidentiality Solutions for Public Cloud Database Services 36
Luca Ferretti, Fabio Pierazzi, Michele Colajanni, and Mirco Marchetti

Active Shield with Electrically Configurable Interconnections 43
Umut Guvenc

BSPL: A Language to Specify and Compose Fine-grained Information Flow Policies 46
Valerie Viet Triem Tong and Ludovic Me

Firewalls Usability: An Experiment Investigating the Usability of Personal Firewalls 54
Bander ALFayyadh, Mohammed AlZomai, and Audun Josang

User Authentication Method with Mobile Phone as Secure Token 61
Ryu Watanabe and Yutaka Miyake

The All-Seeing Eye: A Massive-Multi-Sensor Zero-Configuration Intrusion Detection System for Web Applications 66
Christoph Pohl and Hans-Joachim Hof

Incremental Certification of Cloud Services 72
Maria Krotsiani, George Spanoudakis, and Khaled Mahbub

Detecting Social-Network Bots Based on Multiscale Behavioral Analysis 81
Francisco Brito, Ivo Petiz, Paulo Salvador, Antonio Nogueira, and Eduardo Rocha

Policy-Aware Provisioning of Cloud Applications 86
Uwe Breitenbucher, Tobias Binz, Oliver Kopp, Frank Leymann, and Matthias Wieland

Fighting Spam by Breaking the Economy of Advertising by Unsolicited Emails 96
Alexander Schmidtke and Hans-Joachim Hof

Smurf Security Defense Mechanism with Split-protocol 102
Harold Ramcharan and Bharat Rawal

Distinguishing Legitimate and Fake/Crude Antivirus Software 109
Masaki Kasuya and Kenji Kono

Behavior Risk: the Indefinite Aspect at the Stuxnet Attack? 117
Wolfgang Boehmer

CAVEAT: Facilitating Interactive and Secure Client-Side Validators for Ruby on Rails applications 126
Timothy Hinrichs, Michael Cueno, Daniel Ruiz, Venkat Venkatakrishnan, and Lenore Zuck

Need Only One Bit: Light-weight Packet Marking for Detecting Compromised Nodes in WSNs 134
Yuichi Sei and Akihiko Ohsuga

Secure Distributed System inspired by Ant Colonies for Road Traffic Management in Emergency Situations 144
Alberto Peinado, Andres Ortiz, and Jorge Munilla

Efficient Image Encryption and Authentication Scheme Based on Chaotic Sequences 150
Mousa Farajallah, Zeinab Fawaz, Safwan El Assad, and Olivier Deforges

Propagation of Truncated Differentials in GOST 156
Nicolas Courtois and Theodosis Mourouzis

PP-2 Block Cipher 162
Krzysztof Bucholc, Krzysztof Chmiel, Anna Grocholewska-Czurylo, and Janusz Stoklosa
