Table of Contents

A Change Impact Analysis Approach to GRL Models 1
Jameleddine Hassine

Information Security in Smart Cities 7
Felipe Silva Ferraz, Carlos Candido Barros Sampaio, and Carlos Andre Guimaraes Ferraz

Early & Quick Function Point Method - An Empirical Validation Experiment 14
Roberto Meli

Software Component Allocation on Heterogeneous Embedded Systems Using Coloured Petri Nets 23
Issam Al-Azzoni

Feature Mining for Product Line Construction 29
Yutian Tang and Hareton Leung

Detecting Disruption Periods on TCP Servers with Passive Packet Traffic Analysis 34
Iria Prieto, Mikel Izal, Eduardo Magana, and Daniel Morato

NumEquaRes - Web Application for Numerical Analysis of Equations 41
Stepan Orlov and Nikolay Shabrov

A Catalogue of Thresholds for Object-Oriented Software Metrics 48
Tarcisio G. S. Filo, Mariza A. S. Bigonha, and Kecia A. M. Ferreira

Hybrid Mockup-driven Development: An Agile Model-driven Approach for Web Applications 56
Gurkan Alpaslan and Oya Kalipsiz

Critical Issues in SPI Programs: A Holistic View 60
Cristiane Ramos, Kathia Oliveira, and Ana Regina Rocha

Data Verification of Telecommunication Projects for Risk Assessment Models 67
Ayse Buharali Olcaysoy and Oya Kalipsiz

A Lightweight Approach to the Early Detection and Resolution of Feature Interactions 72
Carlo Montangero and Laura Semini

Developing a Repository for Component-based Energy-Efficient Software Development 78
Doohwan Kim and Jang-Eui Hong

Automatic Generation of Sequence Diagrams and Updating Domain Model from Use Cases 85

Fabio Souza and Fernando Giorno

Framework for Developing Scientific Applications: Solving 1D and 2D Schrodinger Equation by using Discrete Variable Representation Method 93
Bojana Koteska, Anastas Mishev, and Ljupco Pejov

Exploring Test Composition: Towards Reusability in Combinatorial Test Design 100
Anna Zamansky and Eitan Farchi

Smart City Applications TestBed 104
Felipe Ferraz, Danilo Silva, and Carlos Ferraz

Towards A Smart-City Security Architecture Proposal and Analysis of Impact of Major Smart-City Security Issues 108
Felipe Ferraz, Carlos Sampaio, and Carlos Ferraz

Towards an Automatic Test Case Decomposition by Means of System Decomposition 115
Marcel Ibe and Andreas Rausch
