Table of Contents

Database Reengineering of the Registry of Tuberculosis 1
Peter Benedik, Vladislav Rajkovic, Andraz Jakelj, Mirjana Kljajic Borstnar, Uros Rajkovic, and Marjana Pikec

Content-based Retrieval of 3D Medical Images 7
Yu Qian, Xiaohong Gao, Martin Loomes, Richard Comley, Balbir Barn, Rui Hui, and Zenmin Tian

Long-term Preservation Solution for Complex Digital Objects Preserved as Archival Information Packages in the Domain of Pharmaceutical Records 13
Hrvoje Stancic, Arian Rajh, and Kresimir Pavlina

Bridging the Gap Between Consumer eHealth and Public Health Through a Diagnostic Decision Support System 22
Takashi Okumura

ePublic Health: Fresh Approaches to Infection Prevention and Control 27
Hans C. Ossebaard, Lisette Van Gemert-Pijnen, and Erwin R. Seydel

Context-sensitive Communication in Hospitals: A User Interface Evaluation and Redesign of Ascom Wireless IP-DECT Phones 37
Terje Solvoll, Annelies Tiemersma, Edouard Kerbage, Stefano Fasani, Ashok Babu Ravuri, and Gunnar Hartvigsen

Towards an Internet-based Infectious Disease Management Platform to Increase Patient Safety 47
Jobke Wentzel, Joyce Karreman, and Julia van Gemert-Pijnen

A concept of a patient-centered healthcare system based on the virtualized networking and information infrastructure 51
Artur Binczewski, Krzysztof Kurowski, Cezary Mazurek, and Maciej Stroinski

Play for Health: Videogame Platform for Motor and Cognitive Telerehabilitation of Patients 59
Francisco Tous, Pedro Ferriol, Alicia Domingo, Alberto de Rodrigo, Miguel Angel Alcalde, Miguel Angel Rujula, Olga Romero, Maria Angeles Farreny, Maria del Carmen Buen, Begona Llano, Elena Ponce, and Petra Vidal

Designing User Friendly Mobile Application to Assist Cancer Patients in Illness Management 64
Jelena Mirkovic, Haakon Bryhni, and Cornelia Ruland

Health Solutions Using Low Cost Mobile Phones and Smart Spaces for the Continuous Monitoring and Remote Diagnostics of Chronic Diseases 72
Carlos Rolim, Fernando Koch, Jim Black, and Claudio Geyer

Using Soft Computer Techniques on Smart Devices for Monitoring Chronic Diseases: the CHRONIOUS case 77
Piero Giacomelli, Giulia Munaro, and Roberto Rosso

Creating a Framework for Testing Wellness Visualization Systems 83
Chitsutha Soomlek and Luigi Benedicenti

Large Scale eHealth Systems: Providing Information to Support Evidence-based Management 89
Hannele Hypponen, Johanna Viitanen, Jarmo Reponen, Persephone Doupi, Vesa Jormanainen, Tinja Laaveri, Jukka Vanska, Ilkka Winblad, and Paivi Hamalainen

Design and Aims of Study to Measure Long-term Efficacy of Interactive Online Dietician Weight Loss Advice in General Practice 96
Vibeke Brandt, Mathilde Pedersen, Dorte Glintborg, Carl Brandt, Kirsten Brandt, Soren Toubro, and Cecilia Arendal

Designing and Implementing an Active Personal Health Record System 102
Juha Puustjarvi and Leena Puustjarvi

Protecting Patient Privacy when Sharing Medical Data 108
Stefan Benzschawel and Marcos Da Silveira

Patient Empowerment and New Citizen Roles through Telehealth Technologies - The Early Stage 114
Jane Clemensen, Janne Rasmussen, Aske Denning, and Mette Atipei Craggs

Stress Intervention Online - Designing for Self-help through Multiple Help 120
Asa Smedberg and Helene Sandmark

Psycho-physiological Stress Monitoring using Mobile and Continous Pulse Transit Time Measurement 126
Stefan Hey and Hatem Sghir

Heuristic Evaluation for Interactive Games within Elderly Users 130
Jaime Andres Garcia Marin, Elaine Lawrence, Karla Felix Navarro, and Christian Sax

Introducing eHealth Business Modelling Instruments for Implementing eHealth Technologies Based on an Integrated Approach with Human-Centered Design 134
Maarten van Limburg and Julia van Gemert-Pijnen

A Dynamic and Customisable Layered Serious Game Design Framework for Improving the Physical and Mental Health of the Aged and the Infirm 140
Karla Felix Navarro

Using Mobile Technology to Enhance Pediatric Diabetes Care Management 146
Robert Rosati, David Russell, and Joann Ahrens

A Joint Organizational and Technical Development of a Telematic Rescue Assistance System for German Emergency Medical Services 150
Marie-Therese Schneiders, Daniel Schilberg, and Sabina Jeschke

Transportation Scheduling Method for Patients in MCI using Electronic Triage Tag 156
Teruhiro Mizumoto, Weihua Sun, Keiichi Yasumoto, and Minoru Ito

A Design Pattern for Information Sharing in Medical Emergency Response to CBRNE Events 164
Robert Dourandish

Expectations and Fears of Urban Versus Rural Population Regarding the use of an Electronic Health Record 169
Rene Baranyi, Susanne Schinkinger, Wolfgang Schramm, and Thomas Grechenig

Telediagnostics of Back Curvature and Posture for Elderly Patients and Remote Access to 3D Data 175
Wojciech Glinkowski, Jakub Michonski, Robert Sitnik, Bozena Glinkowska, Marcin Witkowski, and Andrzej Gorecki
